

## Job Offer

All over the world, large market-leading enterprises rely on metal and plastics high precision components by Heitkamp & Thumann Group. With more than 2,000 employees in 26 production plants and sales offices worldwide, we ensure proximity to our internationally operating partners.

Highly qualified employees are our key assets - at any location and in any position. They carry a culture of permanent innovation. A culture that sets new impulses for constant optimization of our products and manufacturing processes. Last but not least, innovations originate from creative team work - across borders and divisions - as well as from close collaboration with our customers and suppliers.

**For our location in Crimmitschau/Germany we are currently looking for a**

### **CNC Miller (m/f)**

In order to support our team we are currently recruiting new staff for CNC milling in single-piece manufacturing.

You will be programming, operating and supervising the CNC-machines.

Willingness to work shifts is a prerequisite.

Driving license and car are advantageous for getting to the workplace.

#### **Your qualification:**

- You have completed a vocational training as miller or skilled worker for CNC with respective professional experience.
- You have good knowledge of single-piece manufacturing, quality control and quality assurance-
- You have experience in the fields of milling and tool presetting.
- You have profound CNC-knowledge and knowledge of CNC-programming and Heidenhain control system.

#### **Interested?**

We look forward to receiving your detailed application by post or email (max. 5MB).
